at Vanderbilt

The Vanderbilt Autism Clinic

The Vanderbilt Autism Clinic (VAC) is a new resource for information about **clinical, research, and outreach** services for autism.

The VAC provides access to a **Family Services Coordinator** who can provide information and guidance about the autism-specialized services and programs at Vanderbilt and throughout the region.

Resources include autism-specialized diagnostic, medical, early intervention, educational, behavioral, and counseling services.

The VAC is brought to the community by VKC/TRIAD and the Vanderbilt Medical Center.
